**OJS / PKP**

**Following.** Presenting experimental or survey data, or any other kind of data depending on the type of research. The results are generally presented in clear and readable tables and figures. Discussion: Meaningful. Good discussion is written as a dialogue that reveals the progress of the research in comparison to previous researches.

5. **The conclusion section of your research paper should include the following:** Contains a summary of research results (the most important research finding) that relates with the objectives written in the introduction and suggestion for further research.
6. **You must use at least 30 references**(every reference must have doi or URL). All references use paper. 60 percent or more references are the latest paper (4 years ago). References are prioritized from international journal databases (<https://www.emerald.com/insight/>, <https://www.sciencedirect.com/>, <https://www.sciencedirect.com/>, <https://ieeexplore.ieee.org/Xplore/home.jsp>, <https://www.jstor.org/>,<https://www.tandfonline.com/>, <https://journals.sagepub.com/>,etc). All references must have Doi or URL.

We also suggested to include at least 5 relevant Jurnal Teknik Industri UMM articles as references (4 years ago). All of the references use a reference manager (Mendeley or endnote).

To ensure a quality picture of the journal, all articles received must send the cover article and other images in high quality. Please provide a higher resolution of images. The minimum resolution of images is 500 dpi. If you use a flowchart in the article, we suggest you use Microsoft Visio. Make sure that the images on your paper can be edited.

1. **Please rechecked sentences structure (grammar, and structure).** To improve readability, We prefer you to use 10-15 words in every sentence.
2. **The maximum of the paper length is 10-14 pages.**
3. **You must recheck using the abbreviation and decimal.** The Abbreviation article must consistent in start to last. Please use a decimal point rather than a comma in numbers (i.e. 3.142 not 3,142)

please download form response revision in the following link <https://bit.ly/2Sy3n0t> if you upload, the form revision is placed after the references in the manuscript.

- now about data collection, data processing procedures so as to produce table 1, table 2, table 3, and figure 1?

-The proposed algorithm should be compared with the state of the art algorithm.

5. Written comment on **the results and discussion:**

- table 1 appears in table 3.

- the discussion of all tables and figures is not deep enough.

- Are the results of this study in accordance with previous studies? there should be a discussion about this

6. Written comment on **the conclusion (included future work):**

- avoid numerical or statistical data on conclusions and abstracts

7. Written comment on **the references (up to date):**

-

8. Written comment on **others:**

- Preferably, related work is presented in the introduction.

### **Readability**

Dear, Muhammad Faisal Ibrahim:

On behalf of the Editorial Board, I am pleased to inform you that your paper entitled: "An Improved Genetic Algorithm for Vehicle Routing Problem Pick-up and Delivery with Time Windows" has been accepted to be published in Jurnal Teknik Industri.

### **Congratulation!**

We decide to: **Accept Submission**

Thanks,

Best Regards
